EDUCATION

BINUS University

Undergraduate Student of Computer Science, *Mobile Application and Technology* GPA: 3.5

Kemanggisan, Jakarta Barat

September 2023 – September 2027

SMAK St. Louis 1

Mathematics and Natural Sciences

Surabaya

July 2020 – June 2023

EXPERIENCES

PT Tera Multi Wahana

Jakarta

Full-Stack Application Developer & IT Support Intern

Februari 2026 – Februari 2027

- Developed and maintained full-stack enterprise applications, including Distribution Management Systems (DMS/Aglis) and Sales Force Automation (SFA) modules, using Flutter, C# .NET, and SQL Server.
- Engineered core business logic, automated transactional workflows, and optimized database queries to streamline enterprise operations.
- Acted as an IT Support Specialist, presenting system architectures and operational workflows directly to clients to facilitate smooth onboarding and online implementation.
- Performed production bug fixing, UI/UX refactoring, and API debugging to ensure system performance, reliability, and stability in live environments.

Pre-Training Program

Jakarta

Pre-Training Asistant Laboratorium BINUS University

October 2023 – November 2023

- Gained foundational knowledge in Java and C programming languages through intensive training.
- Developed skills in explaining and presenting technical material effectively to an audience.
- Enhanced communication and teaching abilities by delivering and clarifying training content.

From Zero to Web3 Hero

Jakarta

Web3 and Blockchain

September 2025 – September 2025

- Acquired fundamental knowledge of blockchain technology and Web3 concepts.
- Learned the basic principles of decentralization, smart contracts, and digital assets.
- Gained insights into the potential applications of Web3 in modern technology.

Web Dev 11.0 – HTML / CSS

Jakarta

Creative Staff

Februari 2025 – Maret 2025

- Gained practical knowledge of HTML and CSS for building and styling web pages.
- Learned to create responsive layouts and apply modern design principles.
- Strengthened understanding of front-end web development fundamentals.

FEATURED PROJECTS

Dojo Movie Kotlin

<https://github.com/WilsenAL/Dojo-Movie>

I developed an Android application called *DoJo Movie*, designed for browsing, viewing, and tracking movies. The app was

built using Kotlin and includes features such as movie search, detailed movie information, and personalized watchlist tracking. Throughout the development process, I applied clean architecture principles, worked on UI/UX design, and integrated external APIs to deliver dynamic content. This project allowed me to strengthen my skills in mobile app development, testing, and performance optimization while gaining practical experience in building and deploying Android applications.

Eira Chatbot *React Native, Node.js, MongoDB* <https://github.com/WilsenAL/Eira-Chatbot>

Built a mobile chatbot application to support psychological well-being using React Native, Node.js, and MongoDB. Implemented conversational flows, user-friendly UI, and secure data handling. Gained experience in full-stack development, API integration, and cross-platform mobile app development.

VHS Vault *Flutter, Node.js* <https://github.com/WilsenAL/VHS-Vault>

Developed a music e-commerce app using Flutter and Node.js, featuring a song catalog, audio preview, and digital purchase system. Focused on delivering a smooth user experience, secure transactions, and scalable backend integration.

CW Store *HTML, CSS, Java Script* <https://github.com/WilsenAL/CW-Store>

Created a modern suit-selling website using HTML, CSS, and JavaScript. Designed to deliver an elegant, responsive, and interactive shopping experience, enabling customers to explore collections and shop online seamlessly.

VR Games *Unity* <https://github.com/WilsenAL/VR-Games>

Developed a VR application using **Unity** and the **XR Interaction Toolkit**, featuring **three interactive levels** with basic VR interactions. Implemented **3D object materials**, multiple color variations, and **text display support** with TextMesh Pro to enhance the immersive experience.

CryptoSen *React Navitve* <https://github.com/WilsenAL/CryptoSen-Intelligence>

Developed an AI-powered cryptocurrency news media platform integrating Natural Language Processing (NLP) to analyze market sentiment, process real-time crypto news, and assist users in data-driven decision-making.
